Chief Executive Officer

As we prepare for a new year and the myriad challenges and opportunities ahead, I am excited to take a moment to reflect on the accomplishments of the Tennessee Primary health centers across Tennessee have impacted the lives of so many.

This year, we commemorated 40 years as an Association. While this is a remarkable milestone, the number most worthy of celebration is 437,532 - the number of patients are individuals across the state, in rural and urban areas, who received access to quality health care that might have otherwise been unavailable to them. When these patients visited a community health center, they received comprehensive care from dedicated professionals committed to improving the lives of individuals, families, and communities. This work is far-reaching and will continue to make a difference for years to come.

Since coming on-board as chief executive officer in May 2018, I have had the opportunity to visit almost all of the health centers that comprise our membership. I've begun which qualities and values are held in common to bind us Conference in October, I shared an old saying: "If you want to go quickly, go alone. If you want to go far, go together." This adage is certainly relevant to the work being done by community health centers. Community health centers individually change lives and positively impact the health and wellness of their communities. However, collectively our Tennessee community health centers change the fabric of our larger society, with access to quality healthcare that welcomes all. It is exceptional care, without exception! The Tennessee Primary Care Association is privileged to be a

and in the years ahead!

Terri Sabella, RN, JD, CPHQ Chief Executive Officer

PROGRAM ACCOMPLISHMENTS **AND HIGHLIGHTS**

CLINICAL AND TELEHEALTH

TPCA has 21 health centers participating in the Center for Quality in Community Health, a network of health centers that share information and expertise to facilitate learning, support quality improvement, and develop leadership. Additionally, TPCA facilitates other networking opportunities, including a new initiative for clinical collaborative pharmacists with initial calls offering updates on collaborative pharmacy practices, the TN Together plan to address the opioid crisis, and medication therapy management. In the area of telehealth, TPCA upgraded equipment for all participating health centers, helped in the development of two school-based telehealth programs, and joined the Tennessee Telehealth Task Force to further support the advancement of telehealth in the state.

ORAL HEALTH

Throughout 2018, TPCA supported the continued growth of oral health services at Tennessee's community health centers. TPCA is also taking steps toward forming an oral health coalition that will include dental providers from other nonprofit organizations across the state

TECHNICALASSISTANCETO HEALTH CENTERS

TPCA actively provides technical assistance to its member health centers in a variety of areas, including governance, compliance, policy, primary care practice coaching, oral health, behavioral health, data analytics, and health information technology (HIT) and telehealth. For the program year ending September 30, 2018, TPCA staff provided approximately 260 episodes of technical assistance and more than 550 total hours of technical assistance.

EDUCATION AND TRAINING

The Association also offers several collaborative learning opportunities, including workgroups, users groups, meetings, and trainings for members to learn and share best practices. In 2018, TPCA held 28 distinct trainings, on topics ranging from Open Enrollment and financial policies to Medicaid PPS and integrating behavioral health. TPCA's Annual Leadership Conference was attended by 99 health center representatives and 32 exhibitors.

HEALTH POLICY

TPCA works to keep our members informed about federal and state policy issues that impact their organizations, and to educate government leaders and others about primary health care in medically underserved communities. Accomplishments in those areas for 2018 included:

- Securing an additional \$500,000 for Health Care Safety Net funding for Tennessee health centers
- Worked with TennCare to implement PPS Change in Scope process, resulting in Medicaid reimbursement increases for health centers
- Organized meetings for 26 Tennessee health center advocates with nine Tennessee Members of Congress and both Tennessee Senators in Washington, and facilitated 35 visits with state legislators on TPCA's 2018 Hill Day.
- Coordinated visits to health centers with several Members of Congress and Tennessee state legislators to increase understanding of community needs, CHC services, and the importance of stable funding.
- In partnership with NACHC, generated more than 6,400 communications (emails and calls) from Tennessee CHC advocates to Members of Congress, advocating for the reauthorization of CHC funding, the continued stability of Medicaid funding, and patient
- Facilitated achievement and recognition of the first Tennessee health center to be recognized as an Advocacy Center of Excellence.

- Sources: U.S. Bureau of Primary Health Care 2017 Uniform Data System (UDS); Capital Link "Value Impact of Health Centers: Tennessee Federally Qualified Health Centers" Report
- Enabling services include case management, patient/community education, outreach, transportation assistance, eligibility assistance, language interpretation, and community health work

Tennessee's community health centers served 437,532 patients in 2017, with service delivery sites in 71 (highlighted above) of the state's 95 counties.

The following health center site guide profiles
Tennessee's community health centers, with
specific information on clinic locations, services
offered, and patients served. Throughout this
guide, health centers are organized based
on Tennessee's Three Grand Divisions
(West, Middle, and East), then listed
alphabetically within each division.
